Background and Regulatory Highlights

In 1946 Congress passed the Hospital Survey and Construction Act. Sponsored by Senators Lister Hill and Harold Burton, the law became widely known as the Hill-Burton Act. Through grants, loans and guaranteed loans authorized by Title VI of the Public Health Service Act, Hill-Burton eventually disbursed more than $4 billion to build and modernize needed hospitals and other health care facilities.

Hill-Burton funds aided nearly 6,900 hospitals and other health care facilities in more than 4,000 communities in the United States. In return for Federal funds, those facilities agreed to provide a reasonable volume of services to persons unable to pay (the uncompensated services assurance).

Current regulations pertaining to the assurance were issued on May 18, 1979. These regulations became effective on September 1, 1979 for most obligated health care facilities, and by May 1, 1980 for all obligated facilities.

Facilities which received Hill-Burton grant aid under Title VI were required to provide uncompensated services for 20 years. The rules affect only the time remaining in that 20 year period. Facilities which received loans are obligated to provide uncompensated services until the loan is repaid.

Facilities aided under Title XVI must provide uncompensated services throughout their existence.

Facilities must provide annually a dollar volume of uncompensated services equal to the lesser of 3 percent of operating costs (minus Medicaid/Medicare reimbursement), or 10 percent of the amount of the Federal assistance received and, adjusted for inflation.

If a Hill-Burton aided facility does not provide this level of uncompensated services in a given year, it is required by law to make up the deficit in the following years. However, a facility which provides more than the required level may have the excess credited to its future years of obligation. This means that a facility may fulfill its obligation in less than 20 years.

Facilities must publish in a local newspaper their plans for allocating uncompensated services. They must also post notices and provide each incoming patient with an individual written notice of the availability of uncompensated services. Facilities are also required to make written determinations of eligibility in response to requests for uncompensated services. Persons unable to pay may request uncompensated services before or after services are provided, including after collection action has been taken.

Individuals wishing further information about the program should contact the Office of Health Facilities, Division of Facilities Compliance, 5600 Fishers Lane, Rockville, Maryland 20857.

Explanatory Notes

The Directory of Obligated Facilities lists items of information that require explanation. These items of information are presented below along with the codes and their definition.

CODE	TYPE OF FACILITY
(1)	General Hospital
(2)	Tuberculosis Hospital
(3)	Mental Hospital or Unit
(4)	Chronic Disease Hospital
(5)	Public Health Center
(6)	Rehabilitation Facility
(7)	Community Mental Health Center or Facility for the Mentally Retarded
(8)	State Health Department Laboratory
(9)	Outpatient Facility
(0)	Nursing Home

CODE	TYPE OF CONTROL
(1)	Private Nonprofit
(2)	City
(3)	County
(4)	State
(5)	Special District
(6)	City-County

UNCOMPENSATED SERVICES OBLIGATION EXPIRATION DATE

The date shown represents twenty years after the completion of constuction (as defined in the regulations) for Title VI grant assisted facilities. In the case of loan or loan guranteed-assisted facility, it is the date the loan is scheduled to be repaid. Where a facility incurs a deficit or provides an excess amount of services, the obligation period could be extended or shortened.

Until a facility is certified by the Department of Health and Human Services as having completed its total 20-year obligation, it will be included in this Directory. Therefore, some facilities listed may have completed their obligation and are awaiting certification.

Program Data Highlights

Approximately 6,900 health care facilities received assistance under Title VI and/or XVI of the Public Health Service Act. About 68 percent, or 4700 of these remain obligated under the uncompensated services assurance as of January 1, 1985. There are 7,630 grants and 332 loans under obligation at the 4700 facilities. Thirty-nine facilities were funded under Title XVI and 30 percent of these were also assisted under Title VI. The types of facilities aided include short-term (general) and long-term hospitals, nursing homes, outpatient facilities, public health centers, rehabilitation facilities, community mental health centers, facilities for the mentally retarded and State Health Department laboratories. Short-term (general) hospital facilities account for nearly two-thirds of the 4700 facilities under obligation.

The dollar volume of uncompensated services to be provided annually by a facility is the lesser of 3 percent of its operating costs (minus Medicaid/Medicare reimbursement), or 10 percent of the amount of Federal assistance it received adjusted for inflation. Federal assistance is defined in the regulations as funds received under Titles VI and/or XVI and grant monies supplementary to these titles under the following acts: District of Columbia Medical Facilities Construction Act of 1968; the Public Works Acceleration Act of 1962; the Public Works and Economic Development Act of 1965; the Appalachian Regional Development Act of 1965; as amended, and the Local Public Works Capital Development and Investment Act of 1976. In the case of a loan or loan guarantee, Federal assistance is the cumulative interest subsidy paid through the facility's current fiscal year and any other payments made by the Department on behalf of the facility.

The total Federal assistance under obligation as of January 1, 1985 is $3.76 billion. Eighty-five percent of that amount ($3.1 billion) is for grant funds received under Title VI and $38 million for Title XVI. The cumulative interest subsidy and other payments made by the Department represent 9 percent or $332 million of the Federal assistance under obligation. The remaining 4 percent, or ($147 million), accounts for supplemental grant assistance and Title XVI monies. Of the supplemental grant assistance under obligation, nearly two-thirds represent funds received under the Appalachian Regional Development Act.

Of the total number of facilities under obligation, the greatest number is in the State of Texas. The States of Ohio and California rank second and third, respectively. The largest dollar amount of Federal Assistance under obligation is in Pennsylvania, with New York and Texas ranking second and third, respectively.

BEST COPY AVAILABLE

Private nonprofit facilities account for nearly half of the 4700 facilities under obligation. Of these facilities, 76 percent or 1,637 are short-term (general) hospitals and 11 percent (259) are nursing homes. Sixty-one percent of the $3.76 billion of the Federal assistance under obligation was provided to the 2,203 private nonprofit health care facilities.

Publicly-owned health care facilities account for a little over half (51 percent) of the total facilities under obligation. Sixty-three percent of the publicly-owned health care facilities are county-owned and operated. Of the 2,447 publicly-owned facilities, 50 percent are short-term (general) hospitals and 29 percent are public health centers. Publicly-owned health facilities accounted for 39 percent of the total Federal assistance under obligation.
